

# EVS PT-2

Vishal Pasala

Class 5D

Roll No 48

**SEC-A**

### Sec - A

I Tick the correct answer

1. Here, as we know, we have to convert 364 cm into Metres, so, to convert cm into m we need to divide by 100.

$$364 \div 100 = \begin{array}{r} 100 \overline{) 364.00} \\ \underline{-300} \phantom{0} \downarrow \\ 64.0 \phantom{0} \downarrow \\ \underline{-60.0} \phantom{0} \downarrow \\ 4.00 \\ \underline{-400} \\ 0 \end{array} = 3.64$$

So, (c) 3.64 is the correct answer

2 We need to convert mm into cm =

$$32(3.2\text{cm}) \div 10 = \begin{array}{r} 3.2 \\ 10 \overline{) 32} \\ \underline{- 32} \\ 0 \end{array} = 3.2\text{cm}$$

so, the answer is (c) 3.2

3. As we know, we have to convert decimals into fractions,  
so,

$$0.08 = 8/100 \text{ (8 hundredths)}$$

So, the correct answer is (d) 8/100

4 (d) Abhishek

We have to make the units same, so

$$\begin{array}{r} 001.62 \\ 100 \overline{) 162.00} \\ \underline{-100} \downarrow \\ 620 \\ \underline{-600} \downarrow \\ 200 \\ \underline{-200} \\ 0 \end{array}$$

$$\begin{array}{r} 1.60 \\ 100 \overline{) 160.0} \\ \underline{-100} \downarrow \\ 60.0 \\ \underline{-60.0} \\ 0 \end{array}$$

We compare the heights and so Abhishek is the tallest.

5 (A) Sq. M

6 (A)

7 All sides of a square are equal, so. To find the ~~area~~ perimeter of the cardboard we need to multiply ~~it~~ by  $4x$ , so  $6 \times 4 = 24 \text{ cm}$

So, the answer is (B) 24 cm

9 ~~A~~ A dozen means 12, so we have to multiply by  $12x$ , so;

$$2.50 \times 12 = 30 \text{ ₹}$$

So, the answer is (B) 30 ₹

10 ~~B~~ We have to multiply by  $3 \times 2.5$ , so

$$\cancel{3 \times 2.5} \quad 2.5 \times 3 = 7.5 \text{ Km}$$

So, the answer is (C) 7.5 Km

## II Fill in the blanks.

11. Two hundred and forty six point Two Three Five
12. 4 Thousandths ( $4/1000$ )
13. Laddakh
14. 4 (Four)
